PIHF

MECHANICAL SPECIFICATIONS

HOW TO ORDER

 Mechanical rotation angle: 240° ± 5° available under drawing (blue l 	265° ± 5° nousing only)
- Electrical rotation angle:	240° ± 20°
– Torque:	0.5 to 2.5 Ncm. (0.7 to 3.4 in-oz)
- Stop torque:	> 10 Ncm. (>14 in-oz)
– Life*:	Up to 100K cycles

15 mm Carbon Potentiometer PT-15

FEATURES

- Carbon resistive element.
- IP54 protection according to IEC 60529.
- Polyester substrate.
- Also upon request:
 - · Long life model for low cost control pot. applications
 - · Low torque option
 - Supplied in magazines for automatic insertion.
 - Wiper positioned at 50% or fully clockwise.
 - · Self extinguishable plastic UL 94V-0.
 - · Cut track option.
 - · Special Tapers.
 - · Mechanical detents.

ELECTRICAL SPECIFICATIONS

- Range of values (*) $100\Omega \le Rn \le 5 M$ (Decad. 1.0 - 2.0 - 2.2 - 2.5 - 4.7 - 5.0)
- Tolerance (*): $100\Omega \leq \text{Rn} \leq 1 \text{M} \ \Omega$ $\quad \mbox{-------} \pm 20\%$ $1M\Omega < Rn \le 5M$ $\pm 30\%$
- Max. Voltage: 250 VDC (lin) 125 VDC (no lin)
- Nominal Power 50°C (122°F) (see power rating curve) 0.25 W (lin) 0.12 W (no lin)
- Taper (*) (Log. & Alog. only $Rn \ge 1K$) Lin ; Log; Alog.
- Residual resistance(*): $\leq 0.5 \%$ Rn (5 Ω min.)
- Equivalent Noise Resistance: \leq 3% Rn (3 Ω min.)
- Operating temperature**: –25°C + 70°C (–13°F + 158°F)

RECOMMENDED CONNECTIONS

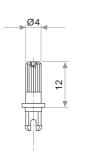

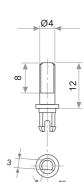

SHAFTS (for N, G and T rotor types, top view)

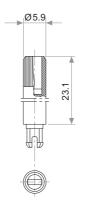

By default shafts, knobs & & thumweels are delivered unassembled.

Mounted shafts, knobs & thumbweels are delivered at random position. Positioning available upon request.

If you wish to use your own plastic shaft/knob/actuator please contact Piher for advice about compatible materials.

THUMBWHEEL

By default shafts, knobs & & thumweels are delivered unassembled.

Mounted shafts, knobs & thumbweels are delivered at random position. Positioning available upon request.

If you wish to use your own plastic shaft/knob/actuator please contact Piher for advice about compatible materials.

DETENT CONFIGURATIONS EXAMPLES

This innovative PT's with detents family has been specifically developed to allow the integration of otherwise large and expensive external mechanisms into the body of the potentiometer thus allowing a high range of configurations: special tapers, torque, tolerances, linearity, cut track, etc

This detent design not only adds a "click" sensation of position, but also offers enormous savings in both cost and space for any given application.

Strong and weak detents can be mixed as per customer's request.

Detent number and positions can be made or fitted to the customer needs or preferences.

 Relative detent positions along the total mechanical travel Unless otherwise specified the detents are evenly spaced (using the end points as reference)

*For more than 13 detents versions please contact your nearest PIHER distributor. Mechanical and/or electrical features may be affected by detents. Detents may not be available for all mounting methods. Please see our separate PTs with detents datasheet at www.piher.net

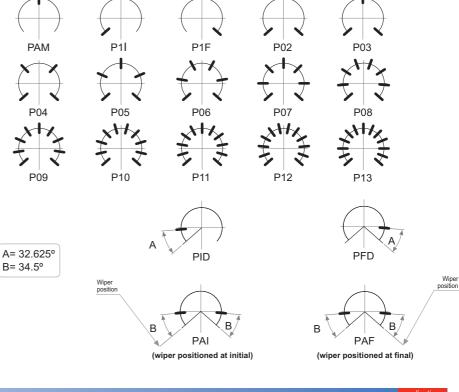

DETENTS WITH CONSTANT VALUE ZONES

PIHER's potentiometers may feature special stepped outputs or 'constant voltage zones' for the 10mm and 15mm product families.

These constant voltage zones can be combined with PIHER's mechanical detents to provide exact alignment between the electrical output (flat areas) and the mechanical detent's positions. The result is a higher level of precision in controlling lighting, temperature, motor or other electronic control systems.

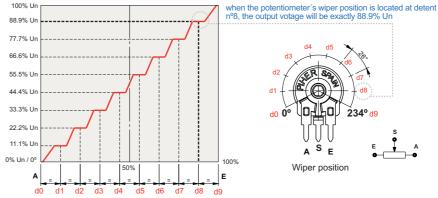

In addition to established catalogue detent configurations, we will design and manufacture any other configuration on our tried-and-tested carbon/cermet & THM/SMD potentiometer technology and processes.

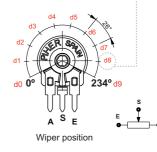

With its exacting control capabilities, our 10mm and 15mm potentiometers series are well suited for many consumer applications such as ovens, ranges, dishwashers, lighting (dimmers), power hand tools, washing machines and HVAC systems.

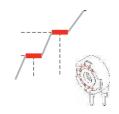

Constant value zones can be combined with strategically located stops matching the flat areas of the output.

10 stepped outputs version example:

Improved repeatability

By combining the constant value zones with the detents, engineers can align the same voltage values with each of the detent stops when rotating the control both forward and backward.

This provides clear mechanical positions that are not only repeatable, but perfectly aligned electrical outputs at each of the (detent) angles.

Piher's detents also prevent output values from changing due to vibration or accidental rotor movements, furthering reliable control consistency.

Main advantages

- Unique, non-overlapping values at each stop (detent position)
- Prevents output value change due to light vibration or accidental rotor micro-movements
- Fully customisable according to customer's needs

Absolute encoders can easily be replaced connecting the potentiometer to the microprocessor's analogue input.

-56-

All Piher products can be adapted to meet customer's requirements.
