## THE NEW WELLER SPN IRONS

# Weller®

## AT WELLER, WE BRING THE LIGHT AND DELIVER INNOVATIVE SOLUTIONS.

■ High performance consumer soldering iron with the latest LED technology. Delivers light to the application while working.

■ A triangular front housing captures the LEDs. Once the tip position is determined, the hand naturally gravitates to the triangular area providing a more stable and effective way to control the tip position.

■ Weller high performance consumer soldering irons deliver comfort and flexibility. A round, soft grip, non-slip handle design helps relax the hand during extended use. The round handle easily provides a mechanism to roll and position the tip for application needs.

■ To ensure long-life, Weller consumer soldering irons come with a high performance stainless steel heater, impact resistant housing, and heat resistant LEDs.
